

ELECTRIC FREEDOM

1.

One- Piece Front Axle:

To keep your ride smooth and trouble-free, we designed a one-Piece axle which adds stability and keeps the wheels constantly aligned

- * Exclusive designed
- * Smoother ride
- * Constantly aligned wheels
- * Eliminates excessive wear

2.

Rack & Pinion Steering:

Our sturdy, responsive steering System is like no other in the Industry. The self-adjusting design results in reduced maintenance and longer life.

- * Rack & pinion design
- * Self-adjusting
- * Responsive
- * low maintenance

3.

Freedom Inductive Throttle Sensor:

Our unique inductive Throttle Sensor was designed for the Smoothest acceleration available in any golf car.

- * Smooth acceleration
- * Unique design
- * Dependable
- * Long Life

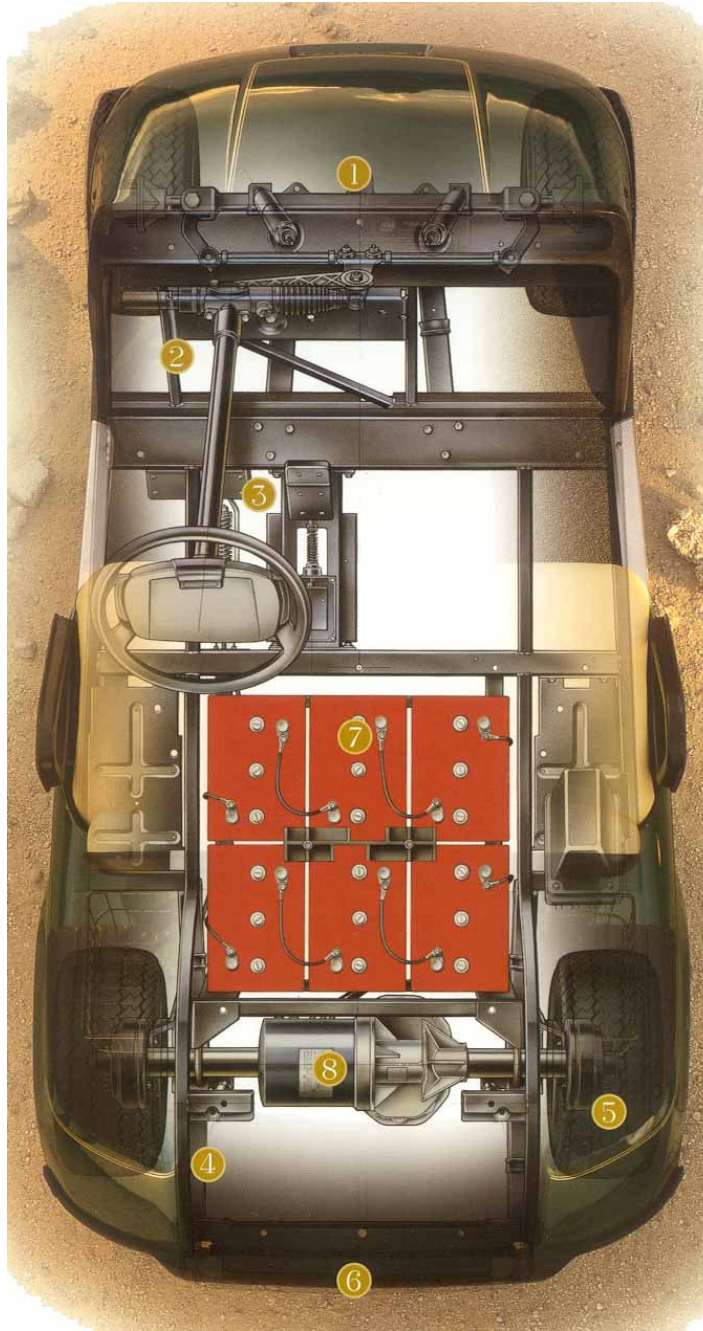

4.

Suspension:

The Freedom offers the smoothest ride in the industry. Any bumps that aren't absorbed

By the tires are easily handled by the rugged suspension.

- * Chassis
- * Multiple leaf springs

5.

Brakes:

With dual rear wheel mechanical drum brakes, the Freedom gives You all the stopping power you need for hilly courses unexpected stops.

- * Exclusive design
- * Automatic self-adjusting
- * positive latch system

6.

Tubular Steel Chassis:

Structural integrity is engineered into the Freedom. The chassis' Tubular design means greater dimensional strength with less Weight.

- * Dimensional strength
- * Minimal weight
- * powder coat paint

7.

Precision Drive System:

The most advanced electric powertrain on the market, the Optional Precision Drive System proves smooth acceleration and Increased vehicle efficiency with regenerative braking.

- * Extended range
- * lower charging costs
- * Top speed of 18 mph.
- * Downhill speed limiting
- * Walk-away braking
- * Anti-rollback
- * Built-in diagnostics

8.

Advance Motors:

The Advance copper wound Motor is the quietest electric Power plant available.

- * Unique design
- * Efficient operation
- * Quiet
